REVERSE

Forged Frying pan

About Ecolon Coating

Ecolon™ coating

Ecolon™ by Neoflam is a professional grade ceramic coating that uses the earth's natural substances. Dedicated to consumer environmental health, Neoflam created Ecolon™ using natural, sustainable minerals.

Safe

Ecolon™ coating is free of harmful chemicals such as PFOA/ PTFE.

Superior Durability

Ecolon™ coating is applied to the interior and exterior of the cookware, making it extremely scratch-resistant.

Easy to clean

This powerful nonstick coating requires less for cooking and makes cleaning a breeze.

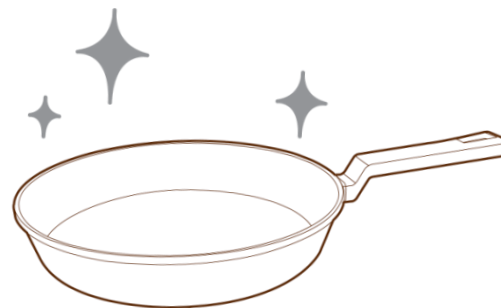

Cast Aluminum Cookware

3X

Lightweight

Cast aluminum cookware is
1/3 the weight of cast iron.

Various Designs

A variety of stunning shapes,
designs and features are available.

About Reverse

- Due to a specialized aluminum forging process, making processed aluminum to have a strong high density and durability.
- Increased heat conservation and conduction makes food more delightful due to different side, bottom thicknesses and weight reduce.
- Cooking at a medium heat made it possible to conserve energy, due to heat conduction of high purity aluminum.
- It catches transformation (distortion, bending, denting) caused by heat, due to its bending processed edge.
- Can be used cleanly due to its projected banding, making oil and food scraps to flow down the surface preventing it from getting staine.

Specialized bending processed edge
